

Manuel Segarra

Full Stack Web Developer

CAREER OBJECTIVES

I am a dedicated full stack web developer committed to continuously enhancing my skill set through hands-on experience. My goal is to secure a dynamic and rewarding position that presents both challenges and opportunities for professional growth, allowing me to further excel in my career journey.

ACADEMIC BACKGROUND

IRONHACK

2023-2023

Successfully completed the Web Development program at Ironhack

Gained proficiency in a diverse range of technologies, including:

- JavaScript
- HTML
- CSS
- MongoDB
- ExpressJS
- ReactJS
- NodeJS
- Handlebars
- Scrum and Agile methodologies

FACULDADE DE ARQUITETURA DA UNIVERSIDADE DE LISBOA

2017-2022

Acquired skills in the following technologies:

- Photoshop
- AutoCad
- Sketchup
- Rhino3D

PROJECTS

LISBON CROSSER

JavaScript Game

- Collaborated on a team project aimed at reinforcing front-end proficiency through game development.
- Leveraged JavaScript, HTML, and CSS to create an engaging and interactive game.
- Teamed up with a fellow classmate to collectively design assets and code the JavaScript components.
- Garnered accolades for "Most Complex Code" and "The Most Original Idea" in recognition of project excellence.
- Demonstrated effective teamwork and task allocation strategies, ensuring timely project completion.
- Successfully managed asset design and contributed extensively to JavaScript programming.
- Strengthened foundational understanding of JavaScript principles and practices through hands-on application.

CLIFFTRACK LISBON

Web App

- Collaborated on a team project aimed at reinforcing back-end proficiency through web app development.
- Utilized a comprehensive tech stack including JavaScript, Handlebars, Express, MongoDB, and Bootstrap to architect and craft a robust web application. The application facilitated streamlined discovery and addition of climbing routes within the Lisbon area.
- Distinguished as the lead contributor to JavaScript programming, I led the development of all route-related functionality while also spearheading the implementation of Handlebars templating and Bootstrap styling to ensure a seamless user experience.
- Through hands-on engagement, I fortified my foundational understanding of JavaScript principles and best practices, effectively applying them in a real-world context to deliver tangible results.

OFFBEAT

Web App

- Collaborated on a team project aimed at reinforcing back-end and front-end proficiency through web app development.
- Focus of the project was making a single page app using react, with a tech stack consisting of JavaScript, ReactJS, ExpressJS, MongoDB and Material UI. The application served as a way for artists and bands to get together according to the bands needs and the instruments the users play.
- I was the creative leader and demonstrated effective teamwork and task allocation strategies, ensuring timely project completion.
- Through hands-on engagement, I fortified my foundational understanding of JavaScript principles and best practices, effectively applying them in a real-world context to deliver tangible results.
