Software Engineer with 3 years of experience. Experienced in building backend systems and maintaining its infrastructure. Led a team of 2-4 members through the development of an iGaming platform, from conception to completion.

PROFESSIONAL EXPERIENCE

Critical TechWorks (via Devoteam) | Lisbon, Portugal

2025 - Present

Software Engineer

- Developed and maintained the Connected Music project, a Spotify integration embedded into BMW and Rolls-Royce in-vehicle infotainment systems
- Responsible for the release process, managing deployment pipelines and coordinating software release to ensure stable, timely delivery to production
- Worked with Typescript in a Kanban-based environment, collaborating closely with different teams and stakeholders across the automotive and tech domains

PixBet | Lisbon, Portugal

2023 - 2025

Backend Team Lead (2024-2025) | Backend Engineer (2023-2024)

- Designed the backend system behind Flabet, Flamengo FC's iGaming platform, using Typescript, NestJS, PostgreSQL and AWS
- Led a team of 4 engineers, worked closely with CTO to plan sprints and deliveries
- Was fully responsible for the deployment of the project into production, as well as all cloud infrastructure
- Ensured seamless database migrations and schema evolution across environments
- Integrated numerous external APIs, including payment, sportsbook, casino games and authentication using facial recognition, as well as 2FA
- Collaborated with internal teams, including frontend, designers and QA testers to develop and launch a new application in just 6 months
- Wrote tests and documentation to ensure quality control, with over 90% coverage
